

I'm a Scientist, Stay at home: Data & safeguarding

I'm a Scientist is a tried and tested STEM engagement programme. While many projects are struggling to adapt to the current situation, *I'm a...* activities have been providing online schools' engagement since 2003, and continue to support teachers with activities their students can take part in from home.

Privacy & data protection

- We take privacy seriously, especially that of school students and young people.
- We ask students for as little data as possible — only what is needed to run the activities — and we keep it for the shortest possible time.
- Student data never leaves our secure sites, and is never shared with any third parties.
- **Read our privacy policy at: imascientist.org.uk/privacy**

Safeguarding

- Safeguarding of students is paramount to us. We take care to make sure our websites are safe and secure.
- DBS checked staff moderate all content.
- Everything is text-based, no audio or video is used.
- **Read our safeguarding statement at: imascientist.org.uk/child-safeguarding-statement**

Tracking students' progress

Teachers can:

- See which students log in
- See what they've asked
- Review chat transcripts

Contact

We're always available to answer any questions. Contact: teachers@imascientist.org.uk
